## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a tray evaluating system, classified in class 700, subclass 222.
  - II. Claims 7-14, drawn to a container handling system for unloading/loading trays on a cart, classified in class 198, subclass 370.1.
  - III. Claims 15-26, drawn to a cart management system, classified in class 198, subclass 347.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a tray evaluating system for sorting useable trays from non-useable trays; invention II has separate utility such as a container handling system for transferring trays between two conveyor systems and a buffer station; and invention III has separate utility such as a cart management system. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III and vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 3651

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gene O. Crawford whose telephone number is 703/305-9733.
